

The Raisia Home is a safe and comfortable standing and transfer device designed to help patients with some trunk balance and weakened leg muscles to stand up. It features clip sling attachments and its compact design makes it the ideal option for home care use.

Sway-Free Lifting

The Raisia Home is an electric sit-to-stand device that can be used as a patient lift or for mobilization and rehabilitation exercises. With adjustable knee supports that can accommodate any size patient and dual wheel casters for easy maneuvering, the Raisia Home is designed for smooth, sway-free lifting. The footplate is height adjustable to five positions and the legs are easy to spread to allow direct access while seated, for example in a wheelchair.

Ideal for Home Care Use

The Raisia Home features a narrow overall width that easily passes through even narrow doorways. It features a lifting arm with additional handles for comfort and easy

usage and leg straps for added security. Extremely quiet operation and a built-in backup belt ensures trouble-free use in and around the home.

Quality

Our products are designed and manufactured to meet all the requirements of relevant ISO, UL, IEC and EN standards. At every stage of the development process, every single product is given extensive attention in design, development and manufacturing. This means that a user of this product feels confident with its reliability and the caregiver feels confident with its safety.
